

2008 Annual Lead Standard									
County Name	Area	Date Designated Nonattainment	Effective Date of Nonattainment Designation	Nonattainment Classification Type	State Implementation Plan Due	Attainment Date (5 yrs from Effective Date of Designation)	Date Reclassified to Attainment w/ Maintenance Plan	Date Maintenance Plan is to be Revised (8 years after being Redesignated)	Notes
Delaware	Part of the City of Muncie, Indiana (bounded by West 26 th Street/Hines Road to the north, Cowan Road to the east, West Fuson Road to the south, and South Hoyt Avenue to the west).	11/22/2010	12/31/2010	Basic	6/30/2012	12/31/2015			Final redesignation petition and maintenance plan submitted to U.S. EPA for review and approval on April 14, 2016. U.S. EPA review in progress.

Primary and secondary lead standards were established in October 1978 at a level of 1.5 micrograms per cubic meter (ug/m³) (43 FR 46246). On November 12, 2008, U.S. EPA lowered the annual lead standard to a level of 0.15 ug/m³ (73 FR 66964).

Attainment of the 2008 lead standard is determined by evaluating the rolling three-month average. Any maximum (not-to-be-exceeded) rolling three-month average evaluated over a three-year period (three calendar years plus the two previous months) must not exceed 0.15 µg/m³. The three-month average is the average of three consecutive monthly averages (January-March, February-April, March-May, etc.).

All other areas of Indiana not listed above were designated unclassifiable/attainment under the 2008 annual lead standard.
